

Envirogroup Limited:

'Breathing Life Into Buildings'

Envirogroup has been in its core business of design, installation and maintenance of air-conditioning, heating and ventilation, gas fitting and plumbing for more than 60 years. Envirogroup provides the services above as well as mechanical services, drainage systems, plumbing and gas appliance commissioning, consultancy, energy audits and IQP Certification.

Envirogroup has traditionally upheld ethics that place high importance on peace of mind for customers and quality end products, with ongoing accountability. This is established most commonly through our company philosophy, which is founded on the fact that the environments we work and live in directly impact our wellbeing and therefore our performance.

At Envirogroup we aim to help our customers maintain safe, healthy environments by providing dependable solutions that stand the test of time. To achieve this we are committed to:

- > Listening and understanding our customers' real needs with a long-term business relationship focus.
- > Researched engineering to get it right the first time.
- > Employing the right people and investing in their professional development.

Envirogroup delivers comprehensive and lasting building services to industrial, commercial and residential customers. Our design and planning team, engineers, gasfitters, plumbers, carpenters, appliance service and air-conditioning tradespeople can take care of every phase, from conception to ongoing maintenance management with a fast response emergency callout service.

Our qualified contracts personnel design, plan and co-ordinate the installation of air-conditioning, heating, plumbing and gas systems in commercial, industrial and residential environments. Our gas solutions people work together with the Contracts division to design and plan gas and plumbing solutions. Following the planning stage our team of qualified tradespeople step in to install and commission the designated systems.

1,000 litre thermal storage cylinder that preheats and stores the domestic hot water (DHW), excess heat not required for DHW is used to heat the swimming pool at Devon Park Apartments, Auckland.

View of the Solar Collectors Installation and Natural Gas fired Rinnai water heaters that ensure the 57 Apartments at the Devon Park Apartments, Auckland, have hot water outside solar system operation hours.

Appropriate reports and manuals are developed so maintenance and servicing may be carried out to correct specifications, optimizing overall efficiency.

We are an authorized service agent for several manufacturers of gas appliances and undertake appliance repairs, inspection and gas installation audits. In alliance with Easy Energy Ltd, we act as an independent retail agent for energy retailers to supply gas to commercial, industrial or residential sites.

Our maintenance team manages the core of Envirogroup's existing business at both a proactive and reactive level. Our individually tailored preventative maintenance programmes, developed from site-specific detail, enable our people to detect problems before they occur and keep systems operating efficiently. A one-hour emergency response and further callout availability around the clock takes care of urgent needs.

Work complies with all statutory requirements set within the industry. We employ registered tradespeople, are IQP registered and Utilitec certified in gas proficiency, and have affiliations with relevant professional associations. These include NZ Master Plumbers Association (NZMPA), Institute Refrigeration Heating and Air-conditioning Engineers (IRHACE), Gas Association NZ (GANZ) and The Institution of Professional Engineers NZ (IPENZ).

We recognize the value of long term business relationships in return for a second-to-none quality service and accountability at all times. Our certified professionals and tradespeople work in consultation with our customers, to achieve the highest level of professionalism, sustainable end results and sound business relationships.

We take pride in developing solutions from concept to completion or simply providing simple aspects of expertise, depending on the need.

Our unique amount of industry knowledge is unheard of in our industry and has allowed us to maintain a standing within our industry. We have made many changes throughout our years of business and have seen that sustainability is the only way toward a brighter future.
