

WHO IS LEAP?

LEAP Australasia Ltd is an Australasian company dedicated to providing and installing eco systems that are innovative, sustainable and environmentally responsible. LEAP aims to improve customers' lives with systems that deliver superior performance, without costing the earth.

Jay Wester, Managing Director says that "the name LEAP conveys our desire to stay at the forefront of our industry and to keep making great leaps forward with products that will improve life for people and the planet."

THE LEAP DIFFERENCE

LEAP takes responsibility for the environment by sourcing and developing products that are more energy and water efficient – putting less strain on natural resources. They are proud of their ability to actively design, develop and engineer new systems to tackle and solve old problems in new ways. LEAP can provide new homes or existing homes and businesses with solutions as widespread as plumbing, solar, hot water, heating, sprinkler systems and wastewater.

PRODUCT RANGE

SOLARGENIUS water heating system offers homeowners a range of ways to harness clean, free solar energy for heating water. SOLARGENIUS cuts down the need for conventional water heating to reduce domestic power bills by between 40% and 75%.

THERMAGENIUS Hot Water Heat Pumps extract renewable energy stored in the ground or in the air to heat water. THERMAGENIUS is not dependent on weather and operates throughout the year. With efficiencies in excess of 300%, payback on a THERMAGENIUS can be as low as 3 years.

MANIFLOW saves energy and conserves water by having a dedicated pipeline from a manifold near the hot water cylinder to each tap or fixture in the house. Less energy and water is wasted as hot water arrives faster at the tap.

TERRATHERM is a highly effective way to radiate comfortable, healthy warmth though your home. TERRATHERM pipes heat by circulating hot water through flexible underfloor pipes. The system delivers warmth by radiant heat transfer starting at ground level. TERRATHERM is built-in and unobtrusive.

BLAZESTOP is an affordable sprinkler system linked to a domestic water supply, putting the reassurance of sprinkler protection within the reach of private homeowners.

LEAP homes are more comfortable to live in, and you can sleep easy knowing that you have energy-efficient solutions that not only offer considerable ongoing savings, but also decreases your environmental footprint. LEAP will provide a full design service and a water and energy solution that works best for you.

It's not easy being GREEN

It may not be easy, but it's essential.

LEAP is about taking responsibility for the environment by sourcing and developing products that are water and energy efficient.
